## INFORMATION

License	Personal vehicle
Birthdate	10/08/1996
Nationality	Belgian

## SKILLS

HTML, CSS, JS	Supabase
NodeJs	Python
ReactJs	NextJs
Postgres	AI (MCP, RAG)

## LANGUAGES

French	Native (C2)
English	Advanced level (B2)
Spanish	Intermediate level (A2)
Italian	Intermediate level (A2)

## SUMMARY

As a passionate full-stack developer, I love learning, taking on creative challenges and solving complex problems.

I am specialized in ReactJs, NextJs, NodeJs and ExpressJs. I build high-performance, scalable and SEO-friendly web applications. I also have experience in SQL/NoSQL databases (PostgreSQL, MongoDB) with Prisma, as well as in deployment via Vercel.

Curious by nature, I'm also interested in AI (especially Reinforcement Learning, VC, RAG and MCP Server). I've launched my own startup and worked with a number of customers as a mobile and web application development consultant.

## DIPLOMAS

- Bachelor's degree in BioTechnical Computer Science (HEH)
- Meta Front-End Certificate

## EXPERIENCE

### Tech-Lead - Fullstack Developer Onlyne SRL

November 2024 – in progress

As a Fullstack engineer, I design and maintain a web ERP application focused on file management (workflows, versioning, permissions). I develop scalable backends (Node.js, PostgreSQL, Supabase...) and responsive interfaces (React, Next.js, Tailwind, React Native). I also integrate APIs, real-time communication and authentication to enhance the user experience, with fluid deployment with Docker and Vercel.

### Tech Lead at Timber Tailor (HOK)

March 2021 – June 2022 | 1 year

At Timber Tailor, my work revolves around the development of several digital tools (website, site management web app, development of IT tools to improve inter-company communication, online prospecting, development of tools/modules for CRM).

### Freelance in Web & App Development

February 2017 – October 2024 | 7 years

Freelance software developer. I've worked with numerous companies in different sectors (start-ups, SMEs, SMIs), which has enabled me to develop a great capacity for adaptation and technical expertise.
